Subject: Important Announcements for CEG3 Poly Students - AY2018/19, Semester 1

This email is meant for CEG3 students of AY17 Poly intake.

Dear CEG3 Students,

Please take note of the following important announcements regarding modules registration:

1. Module Registration via CORS
The various dates and activities for each bidding round are stated via the CORS website. Round 0 will commence tomorrow, 26 July 2018 (Thurs). You may refer to the recommended study schedules before bidding in CORS.
PS: The recommended schedule for AY17 Poly intake has been updated on 9 July 2018; the updates are highlighted in brown fonts (and explained below).

2. Core modules

AY17 Poly intake	To be pre-allocated (if pre-req(s) is satisfied)			
Students exempted from CG1111	CG2027 & CG2028	CS2113	MA1508E [LE3 AND TE3]	ST2334
Students NOT exempted from CG1111	CG2271			

With effect from AY2018/19 (August 2018), EE3204 will be recoded to EE4204 Computer Networks. EE4204's pre-req is ST2334. EE4204 will remain as part of CEG Major requirements/core modules. As such, there is a mutual swap in the recommended semester to read ST2334 (from sem 4 to sem 3) and EE4204 (to sem 4).

NOTE 1: 1 bid point will be deducted from your Program account for each pre-allocated module. If you fulfilled the respective pre-req(s) but still not pre-allocated by 2 Aug, please flag to me. **It is the students' responsibility to ensure there are no clashes in timetable (lecture, tutorial, lab and exam) for all the modules.**

NOTE 2: If you need to retake any core modules, bid via CORS from R1A onwards. If a particular modules is not available, email me.

NOTE 3: CFG1010 (2 MCs)/UEM will no longer be offered with effect from AY18/19. You would have received an email from Centre for Future-ready Graduates (CFG) on the voluntary opt-in for CFG1002 (2 MCs). If you are interested to take CFG1002 (as UEM), please respond directly.

NOTE 4: Workload Policy
- For students with a CAP of **more than or equal to** 2.0, the maximum workload (pre-allocated & bided modules) is 23 MCs for Rounds 1 and 2, and 25 MCs for Round 3 onwards. This means that students can bid up to 23 MCs (inclusive of pre-allocated modules) for Rounds 1 & 2, and up to 25 MCs from Round 3 onwards.
- For students with a CAP of **less than** 2.0, the maximum semestral workload is 20 MCs for all bidding rounds. This means that you cannot exceed a workload of 20 MCs in the semester.
- The minimum semestral workload is 18 MCs.

Many students often consider the second year (Year 3) the most difficult. For students with low CAP and/or on the borderline, you are advised to space out your modules evenly. If you want to delay any core modules, please email me to discuss (dropping of pre-allocated module, vet revised study plan, etc).

NOTE 5: You are advised not to overload yourself by taking more than the recommended workload. If you still wish to increase your semestral workload to *above 20 or 25 MCs*, you should email the following information to your **Year 3 Coordinator A/Prof Bharadwaj Veeravalli** elebv@nus.edu.sg **& cc. me** cegcwn@nus.edu.sg:

i) Total MCs you planned to take in sem 1
ii) Supporting reasons for exceeding maximum workload in sem 1
(iii) Sem 1 workplan (module code, title and MCs for the respective modules)
(iv) Personal details (name, student no., course code, current CAP)

Please note that even if you are granted the extra MCs, you can only bid from Round 3 onwards.

3. Tutorial and Lab classes registration

Module	Tutorial	Lab
CG2028 (wk 1-6)	Ballot for tutorial in CORS from **13 - 15 Aug 2018 (iteration 1)**	3 labs in wks 3, 5 & 6; lab 01 (Wed, 2-5pm) will be allocated by 10 Aug
CG2027 (wk 7-13)	Will be allocated on 16 Aug, following the same timing as your CG2028 tut	N.A.
CG2271	Ballot for tutorial in CORS from **20 - 23 Aug 2018 (iteration 2)**	Ballot for lab in CORS from **20 - 23 Aug 2018 (iteration 2)**
CS2113	Ballot for tutorial in CORS from **20 - 23 Aug 2018 (iteration 2)**	N.A.
MA1508E	Same lecturer for lect & tutorial - [LE3 AND TE3]	N.A.
ST2334	Ballot for tutorial in CORS from **20 - 23 Aug 2018 (iteration 2)**	N.A.

4. CEG Technical Electives

As per the recommended schedule, please consider reading technical electives (TEs) from sem 4 (sem 2, AY18/19) onwards.
FYI, JAC is amidst revising the list of modules within CEG concentrations for AY17 intake and after. The current TE page is for your seniors from AY16 intake and prior. We hope to put up a similar TE page for CEG AY17 intake and after, by Oct 2018 or so.

5. General Education (GE) requirements and Unrestricted Elective Modules (UEM)

Students who wish to read GEM and/or UEM have to ensure that the timetables of these modules do NOT clash with the timetable (lecture, tutorial, lab AND exam) of their core modules.
For more information on GEM, refer to http://www.nus.edu.sg//registrar/general-education/important-information-for-students.html
You will need to bid in CORS for these GEM and/or UEM from R2A (& onwards).

6. CEG3 Briefing

Starting AY18/19, there won't be any joint department briefing for CEG3 students (owing to poor attendance from past AYs since many Year 3 students are away on IA/SEP/NOC). Nonetheless, if you have any queries, feel free to clarify with/email us.

7. Important Websites

Please refer to the following websites for important information:

- CEG Third Year Students website

- S/U Policy

- [FFG Checklists](#)

- [Examination Timetable](#): **Please check for timetable/examination clashes before bidding for your**

modules.

For enquiries, email me at cegcwn@nus.edu.sg. PS: Type my email address instead of searching by name. There's a student with the same name.
You are reminded to check and clear your NUSNET email regularly. For ease of correspondence, please retain the email history and sign-off with your name and student number. FYI, emails sent from students' personal email accounts have been (randomly) routed to my spam/junk folder (which I don't check).

Regards,
Winnie
